Infrastructure Optimization Cisco-Based Infrastructure Solutions

With the immense need to ICT Infrastructure solutions; ensuring business continuity, catering for current and future needs, and providing tools to better manage your daily business needs, Estarta has developed a set of IT infrastructure solutions.

We comprehend that your infrastructure technology needs are directly tied to your organizations unique size, operations and business challenges. We offer Infrastructure Optimization solutions designed specifically to give businesses the knowledge to gain maximum advantage from their current systems. In parallel, we also help you select and implement the right technologies for your environment.

Moreover, our Infrastructure Optimization offering includes measuring maturity, establishing a roadmap, identifying project's improving security.

▲ Unified Communications:

In today's businesses, time and efficiency are the most important factors and indicators of success; people tend to utilize their time during the day while caring for cost reduction. With Cisco's Unified Communications (UC) offering, Governments and Enterprises can do cost savings while maintaining high-level of productivity and innovation.

One of the main focuses of Unified Communications is reducing communication response time, which often is essential in decision making and acting upon instructions. Thus, Estarta took the lead in offering Cisco Unified Communications (UC) implementation in the region based on the latest Cisco technologies, including software and hardware tools allowing enterprises to benefit from this cutting-edge solution in the world of communications.

Cisco UC offers a compelling solution to your most pressing business needs, with guaranteed fast ROI, and low TCO.

Unified Communications represents a collection of real-time services integrated and bundled in one platform, including:

- Instant Messaging (IM)
- Video Conferencing
- IP Telephony
- Unified messaging

Whether the corporate is an enterprise or small business, Estarta can help implementing End to End UC solutions that assist in cutting cost and increase employees' productivity using a set of communication boosters. The package of UC products that Estarta offers to implement suits for several sectors, such as government entities, healthcare, private businesses, and many others.

▲ Wide Area Application Acceleration:

Business applications are growing rapidly in today's world. As these applications get more sophisticated; they get more complicated. As a result, business applications are demanding more PC resources mainly on Network Bandwidth.

The need for Network Acceleration and Optimization between your offices arises in this area to minimize the annual cost of leasing Wide Area (WAN) connection from the Internet Service Provider (ISP). Estarta built this offering based on the market leader in Network Solutions and Acceleration, Cisco Systems.

Estarta helps adopting Cisco Wide Area Application Services (WAAS) solution to guarantee WAN optimization. We will select and implement the right technologies for your environment.

▲ Wireless Solutions:

Estarta Solutions offers the latest Cisco Integrated Wireless Solutions with the latest technology in this field. Assessing how the deployment of Integrated Wireless Networks affects the security state of your network is another important service which we provide, leading to the success of Cisco Integrated Wireless Solutions deployment.

Cisco Integrated Wireless Network cost-effectively provides superior wireless security, management, deployment, radio frequency (RF) technology and mobility. Such features enable real time access to core business applications, ensuring enterprise-class secure connectivity simultaneously.

▲ Network Security:

Estarta's consulting team helps protecting your business assets; in terms of planning, designing, implementing and optimizing network security solutions that are critical to managing information security.

Our experience in working with large and small networks gives us this specific insight into the organization's security needs. We understand that security should be customized for each organization and adapted to its specific environment. Estarta Solutions specializes in providing the right security for your organization.

Estarta Solutions is a global IT solutions provider and innovator, focusing on delivering solutions to the public, telecommunications and financial services sectors. Its offerings range from IT consulting to product development and solutions design and implementation. Powered by over two decades of global experience, the company's client base extends the US to Europe and the Middle East. The company is composed of highly talented and skilled teams of business and technical professionals. Estarta Solutions has strategic partnerships with, and is partially owned by, Microsoft Corporation and Cisco Systems.
