## Infrastructure Optimization Microsoft-Based Infrastructure Solutions

Estarta realizes that the success of any organization should be sustained by an unequivocal, stable, and secure IT infrastructure. Therefore, we offer a broad set of infrastructure services which enables our clients to capitalize on their IT systems, enhance execution, meet objectives, and reduce costs.

Accordingly, our infrastructure optimization offerings cover assessment, design, implementation, and maintenance of the organization's infrastructure.

Our experience with infrastructure solutions involves a wide range of applications, such as Unified Communications (UC), Security Solutions, and System Management Solutions. Built on Microsoft latest technologies and deployed to a customer base in the region.

◆ Identity and Security Solutions

▲ Windows Server® Active Directory®(AD)

- **Domain Services:** Provides support for directory-enabled applications, and a secured and manageable infrastructure for user and resource management.
- **Windows Server® Rights Management Services (RMS):**an information protection technology that works with AD RMS-enabled applications to help your customers to safeguard digital information from unauthorized use.
- **Active Directory Federation Services (AD FS):** provides a Web single-sign-on (SSO) technologies to authenticate a user to multiple Web applications over the life of a single online session
- **Windows Server® Certificate Services (CS):** an Identity and Access Control security technology that provides customizable services for certificates used in software security systems.

▲ Microsoft® Forefront™

- **Microsoft® Forefront™ Threat Management Gateway ( TMG):** Estarta provides you with a solution that enables you to safely and productively use the Internet without worrying about malware and other threats.
- **Microsoft® Forefront™ Client Security:** offers unified protection,simplified administration,and critical visibility and control.
- **Microsoft® Forefront™ Protection for Exchange (FPE):** gives customers a fast and effective protection against malware and spam that helps them increases their revenue.
- **Microsoft® Forefront™ Security for SharePoint®:** Helps customers protect their collaboration environments against viruses and inappropriate content with Microsoft Forefront Protection for SharePoint.
- **Microsoft® Forefront™ Security for Office Communications Server (OCS):** Internet threats, malware, and competitive information leaks can be transmitted through instant messaging (IM) systems—creating significant vulnerabilities.
- **Microsoft® Forefront™ Identity Manager (FIM):** Benefits customers in protecting and securing access with Microsoft Identity and Access (IDA) solutions,a comprehensive set of integrated offerings designed to help companies manage user identities and associated access privileges.

◆ Microsoft® Secure Messaging and Collaboration Solutions

- **Microsoft® Exchange Server:** Helps reducing travel,training,meeting, facilities,and communications costs by enabling an efficient and secure access to e-mail,calendars,attachments,contac ts,and more—no matter where they are or what type of device they are using.

◆ Microsoft® Unified Communication Solutions

- **Microsoft® Lync™ Server:** Organizations are looking for integrated productivity tools that enable users to communicate from anywhere in a cost-effective and secure manner. Microsoft® Lync™ Server delivers a user experience that brings together the different ways people communicate in a single interface while reducing both capital and operational costs

◆ Microsoft® System Center: Management,Monitoring and Protection Solutions

- **Microsoft® System Center Configuration Manager:** Enables businesses to gain greater control over their IT systems.Deep integration with Microsoft Family of products enables you to deliver comprehensive systems-management solutions.
- **Microsoft® System Center Operation Manager:** System downtime means lost productivity for your customers.Microsoft® System Center Operations Manager helps customers monitor the health of their IT environments to proactively maintain their systems.
- **Microsoft® System Center Data Protection Manager:** Helps you build your expertise in using the platform to efficiently and continuously protect business-critical data for Microsoft application and file servers.

Estarta Solutions is a global IT solutions provider and innovator, focusing on delivering solutions to the public, telecommunications and financial services sectors.
