

## Enabling Business Agility

*The needs of businesses in the financial services and banking industry grow as they are faced with the challenges of becoming modernized and efficient in providing their services. Financial services organizations constantly seek new ways to drive revenue growth, adapt to customer needs and requirements, and achieve a high return on investment. We offer advanced solutions which enhance your business performance and strengthen your appeal to a wider client base. Estarta Solutions adds true value to financial services organizations by bridging the gap between business concepts and technology.*

### Channel Integration Platform

Financial services organizations need to seamlessly integrate between various systems and facilitate data exchange. Such integration among systems is your key to increase utilization of legacy enterprise systems and to adopt future systems. Our integration platform and adapters provide you with a single integration infrastructure for integrating diverse, distributed, and incompatible systems, making it faster and easier to tie together the applications into business processes that can span the enterprise business.

### Enterprise Project Management

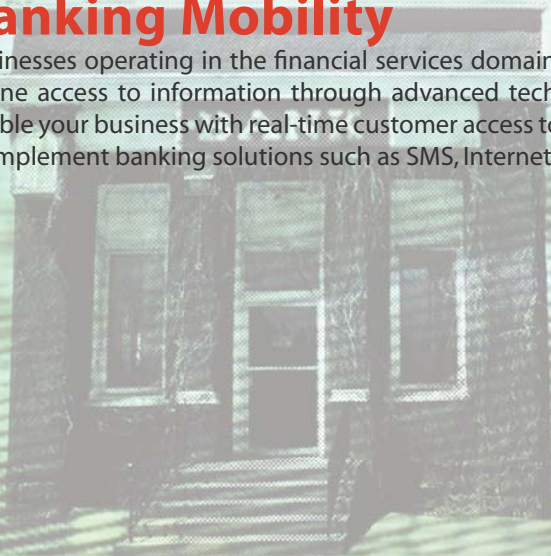

It is becoming increasingly challenging to align projects to the overall strategies that drive businesses. While your organization runs projects and assigns teams, our solution enables you with greater visibility and real-time reporting of projects' progress and plans. It also emphasizes team collaboration and cooperation, leading to efficiency. We help you standardize your project delivery processes according to best practices and taking into consideration your existing rules and guidelines.

### Intranet and Portal Solution

The expansion of your organization should be accompanied with higher capabilities to provide real time information to your employees. To modernize your financial services business, you need to acquire full control of your documents and allow rapid access to information through reliable solutions. Through our Intranet and portal solutions, your employees will collaborate and exchange information regardless of office or branch location.

### Banking Mobility

Businesses operating in the financial services domain need to provide their clients with speedy and online access to information through advanced technologies. Through our advanced offerings, we enable your business with real-time customer access to banking information. We work closely with you to implement banking solutions such as SMS, Internet, WAP, and PDA banking.

# Financial Services

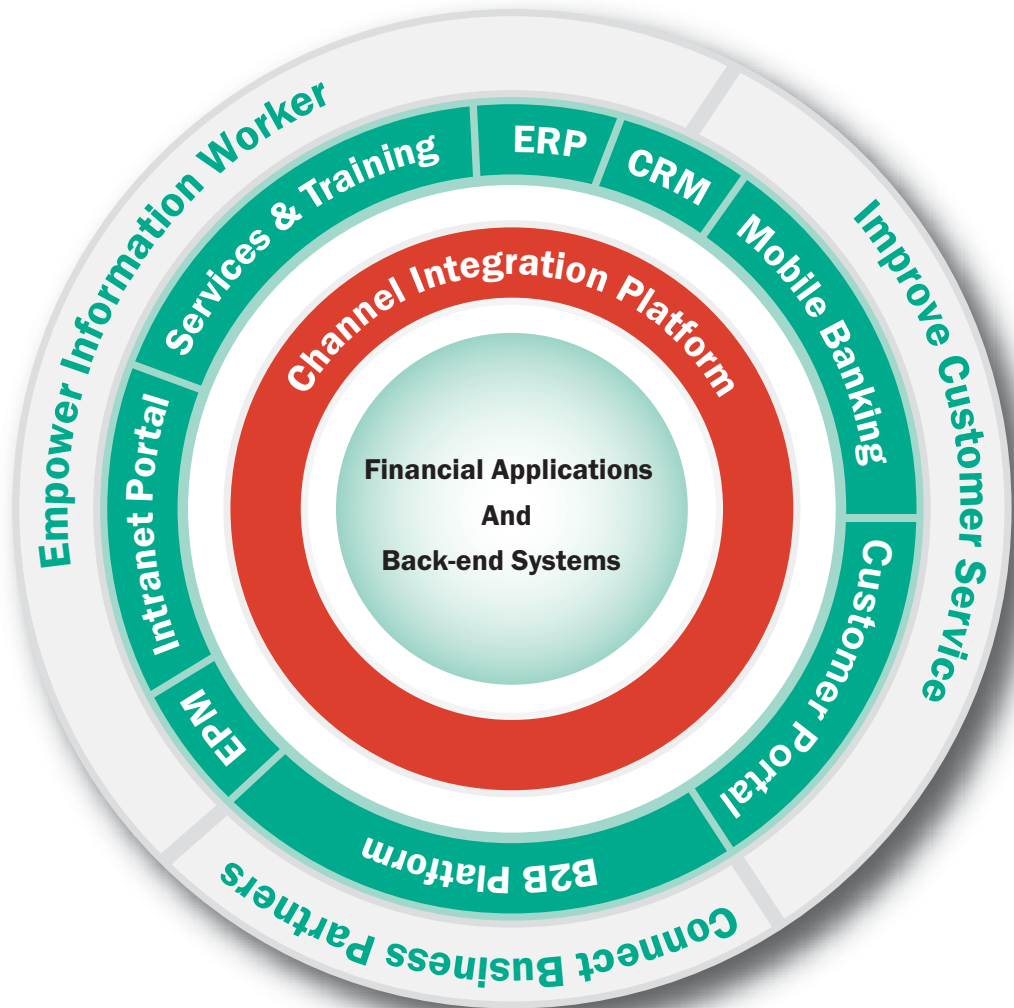

## CRM

Today's financial services organizations are paying more attention to improving relationships with their customers to maximize profitability. Building customer loyalty starts with creating value for customer relationships and mobilizing resources around them. With CRM, we help you establish full understanding of your customers through a single view of their records. Our solution also helps you to provide fast and efficient customer service, positioning you as a pioneer in attending to your customers' needs.

## Services and Training

With the growing demand of IT skills, organizations in the financial services industry around the world are looking for credible outsourcing partners for their mission-critical tasks. At Estarta Solutions, we have built a strong track record over the years providing outsourcing services and training for enterprises using cutting-edge technologies and world class skills.
